

SC4 Amateur Radio Club
'18 Technician Class License Preparation

Two day class runs April 7 and 8, from 9:00 to 4:30 both days and will be held in Half Moon Bay at the fire station, 1191 Main Street. Please bring a bag lunch.

We will be using Gordon West's "Technician Class" book, 8th edition (provided) as our text and assign as homework, practice using the online tests at <<http://copaseticflows.appspot.com/hamtest>> or one of the free, phone, apps (we'll provide links in class.) Plan to spend about half an hour each day with the practice exams. The cost for the class materials, including text book, is \$25.

Saturday, April 14, we will carpool to and from the Sunnyvale VE test session. For the exam you will need to bring \$15 cash, two forms of ID (one with picture) and your social security number or FRN. You may bring a calculator. Youngsters can be identified by an accompanying adult with satisfactory ID. Within a few days after you pass the exam, your new call sign will be posted on the FCC database and you will be mailed your license.

If you cannot attend the exam on the 14th, there is a test session on April 21 in Saratoga. We can help you find other exam sessions as well, generally the first 3 Saturdays of each month. Cost of the exam varies and presently runs about \$15, depending on the VEC administering the test.

Please complete the following and mail before March 28 with your \$25 check to:
